Professional Summary

With an MPH in Epidemiology and managerial tenure under the National Urban Health Mission at Pune Municipal Corporation, I specialize in advancing urban health systems through evidence-based strategies. My expertise spans analytics, policy integration, and stakeholder engagement, enabling me to lead multidisciplinary teams, optimize resources, and deliver sustainable public health outcomes in complex government settings.

Technical Skills

Data Analytics: SQL, Excel, SPSS, R, Stata, Power BI, Tableau
Visualization: Dashboards, KPI tracking, trend analysis
Statistical Modeling: Regression, hypothesis testing, survey analysis
Soft Skills: Communication, critical thinking, stakeholder engagement
Languages: English, Hindi, Marathi

Professional Experience

Public Health Manager Aug 2025
National Urban Health Mission (NUHM) *Pune, India*

- Led urban health interventions targeting maternal and child health, non-communicable diseases, and sanitation.
- Coordinated with municipal bodies and NGOs to implement community outreach programmes.
- Monitored health indicators and prepared analytical reports for state-level review.
- Supervised field staff and ensured compliance with national health guidelines.
- Strengthened coordination with healthcare facilities and community stakeholders to improve service delivery and programme implementation.
- Tracked key performance indicators and used data-driven insights to support monitoring, evaluation, and continuous improvement of urban health programmes.

Data Analytics Intern 2025
iStudio, Pune *India*

- Selected via iCAT for competitive analytics internship.
- Applied SQL, SPSS and Power BI to real-world health datasets.
- Developed dashboards and visualizations for program performance tracking.

Public Health Intern 2024
State Nodal NGO - SATHI *India*

- Conducted community health data and program evaluation.
- Documented gaps in rural health delivery using reflective journaling.

Projects & Research

Impact of Assistive Devices on Independence of People with Disabilites in Pune - Thesis

- Investigated how assistive devices influence independence, daily functioning, and quality of life among people with disabilities.
- Evaluated barriers to assistive device access and their impact on users' participation in personal, social, and community activities.

Designed and executed mixed - methods research.

- Designed and executed a mixed-methods research approach combining quantitative and qualitative data collection.
- Analyzed findings to identify key patterns, experiences, and factors influencing the research outcomes.

Community Health Evaluation: Rural health delivery assessment with SATHI.

- Assessed healthcare delivery in rural communities, focusing on accessibility, utilization, and gaps in health services.
- Identified key challenges in rural healthcare delivery and evaluated opportunities for improving community health outcomes.

Urban Health Dashboard: NUHM performance metrics visualization.

- Developed visual representations of NUHM performance metrics to support monitoring and interpretation of urban health data.
- Organized key indicators into an accessible dashboard format to facilitate data-driven assessment of program performance.

Achievements & Affiliations

Second-Level Radiographer - Nepal Health Professional Council

Urban95 Kids Festival Volunteer - Bernard van Leer Foundation

Internship Offer - iStudio (via iCAT performance)

Courses & Certifications

Google Data Analytics Professional Certificate (in progress)

- Developing skills in data analysis, data cleaning, visualization, and interpretation using industry-standard tools and techniques.
- Building practical knowledge of analytical workflows to support data-driven decision-making.

Health Informatics Specialization – Johns Hopkins University

- Developed foundational knowledge of health information systems, healthcare data, and informatics principles.
- Explored the use of technology and data analytics to improve healthcare delivery and outcomes.

SPSS Fundamentals – INDACA Institute

- Gained practical knowledge of SPSS for data entry, management, statistical analysis, and interpretation.
- Applied fundamental statistical techniques to analyze datasets and communicate analytical findings.

CT Technologist Workshop – Siemens Healthineers

- Strengthened understanding of CT imaging protocols, scanning techniques, and image quality optimization.
- Learned best practices for CT workflow, patient safety, and effective use of imaging technology.

International Society of Radiographers – Certificate of Participation
